out Play Protect, which regularly scans your device for malware. By default, this setting is turned on, but you should check if it is twice. Go to Google Play Protect > Settings > Security & location and switch to Scan for security threats. Here you can also see the last scanned applications and the time of the last scan. Google Play Protect also scans apps in the Play Store before you download them. If you try to download an app from somewhere other than Google Play using a mobile browser or other app, how much warning will you get that your device won't allow unknown apps to be installed from that source. Go to Settings > Apps & Notifications > Advanced > Custom app access > install unknown apps. You'll see a list of apps that can download apps like Chrome and other mobile browsers. Tap any app you use to download apps and switch from this source to Allow. Be sure that an unknown app can compromise your device. To further protect yourself, go to Improve harmful app detection in the Google Play Protect section of your device's settings. You can download Google Play apps from a desktop browser in addition to your smartphone or tablet. The Google Play Store app is built into most Android devices and is available for some Chromebooks. Google keeps a working list of devices supported by the Play Store. Open the Google Play Store on your smartphone or tablet. Be sure to connect your device to Wi-Fi or cellular. Search for the app you want to download or choose a category such as Games or Movies & TV, or other filters such as Editor's Choice or Family. Tap the list of apps. Tap Install; When the download is complete, install it on Open. On the desktop, you can manage app downloads for android phones or tablets that you connect to your Google account. If you use multiple devices or manage app downloads for others, such as your children, it's handy to use the Play Store on your desktop. Go to the play.google.com browser. Search for the app you want to download or Categories, Top Charts, or New Versions to navigate the library. After you find the app, click its entry, and then install it. If you have multiple Android phones connected to your Google account, you'll see a list of smartphones and tablets. Select your device; if you're not sure which one is which, each one has a recently used date next to it. Click Install or Buy, and the app should appear on your device in a few minutes. The price of the app is on the Buy button. Android users can also access apps from Amazon's store in a desktop web browser or Amazon AppStore app. Apps sold here are sometimes cheaper and even freer than Google Play. You can also earn the right money for future purchases. If you don't have Amazon AppStore installed, you can download it, but you'll need to enable a setting called install unknown apps. Open Amazon Appstore on your phone. Search for or scan the app you want. When you find it, tap the Get button or button, which includes the price of a paid app. Then tap Download on the next page. If you have Amazon Appstore on your smartphone or tablet, you can download and buy apps directly from there. You Amazon.com Amazon Appstore via mobile browser by visiting the mobile browser or through the Amazon Shopping app. You must allow the application to install unknown applications in settings, as described above. Click the menu icon (three horizontal lines) at the top left of the Amazon website. Click Appstore for Android. Click All Apps and Games. (There is also an option to download the Amazon Appstore app.) Search for or browse the app you want and click its entry. Click Get App (free) or Buy Now (paid).
